# About Us

Founded in 2018, Apollo Systems & Technologies is a premier technology solutions provider committed to engineering excellence and consistently exceeding expectations. We specialize in designing and deploying intelligent environments that enhance security, efficiency, and comfort across every space we serve.

With a presence across government, commercial, and residential sectors, we bridge the gap between complex infrastructure and seamless user experiences. Our expertise spans advanced smart home automation, enterprise level security solutions, and sophisticated AV systems delivering the technical foundation for a smarter, more sustainable future.

## Our Vision

To emerge as India's most trusted and comprehensive technology solutions partner, setting new benchmarks in innovation, service excellence, and customer experience. We aspire to build a nationwide presence with strategically located operational offices across states, ensuring that advanced technology, expert support, and integrated solutions are accessible to every individual and organization we serve. Our vision is to consistently exceed expectations while shaping a future where intelligent living and seamless connectivity become a standard for all.

## Our Mission

Our mission is to deliver end to end technology solutions that combine innovation, reliability, and exceptional service to elevate the way people live and work. We are committed to building long term trust by providing seamless smart home, AV, security, networking, and integrated technology systems tailored to the evolving needs of our customers. As we expand our operational footprint across states and districts, we strive to ensure that advanced technology, expert support, and world class experiences are accessible to every community we serve. Through continuous improvement, strong partnerships, and a customerfirst mindset, we aim to set new standards of excellence in India's technology landscape.

## Our Core Values

### Innovation

Embracing emerging technologies to deliver future ready solutions that exceed market expectations.

### Partnership

C lose collaboration with clients and partners to align solutions with specific needs.

### Excellence

Uncompromising quality standards from planning to execution for exceptional results.

### Sustainability

Energy efficiency and environmental responsibility in all our solutions.

### Reliability

Robust systems with comprehensive support for long-term peace of mind.

### Customer-Centric

Every decision made with clients' long-term success and satisfaction in mind.

# Why Go Smart?

A smart home isn't just about convenience or luxury it's about gaining complete control over your living environment. With integrated automation, you can manage lighting, climate, entertainment, and appliances effortlessly from anywhere, creating a home that intuitively adapts to your lifestyle. Beyond comfort, smart home technology enhances your security and safety through intelligent surveillance, realtime alerts, access control, and automated protection systems. It also improves power efficiency by optimizing energy usage across your home. Choosing a smart home means choosing a space that is more efficient, more secure, and truly designed around you.

- 1 Energy efficient & Eco friendly
- 2 Control from anywhere through mobile
- 3 Worry free
- 4 Schedules & automated tasks
- 5 Voice command

Apollo Systems & Technologies delivers cutting-edge smart home solutions that transform living spaces into intelligent environments. Our home automation systems ensure seamless control, enhanced security, and optimal energy efficiency

# 3D Smart Lighting Curtain

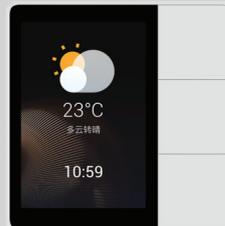

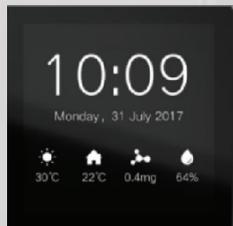

MixPad X

(MixPad

# Smart Touch Panels

MixPad smart control panels bring lighting, climate, and devices together into one seamless interface designed for modern living.

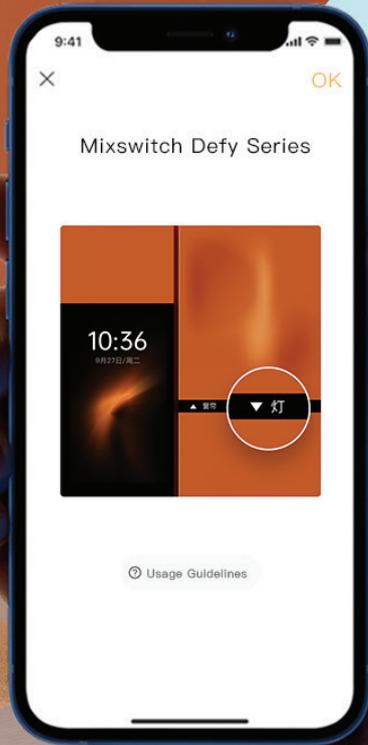

# Smart Switches

## Smart Switches – Classic Series

The Smart Switches Classic Series is available in three elegant colors White, Gray, and Golden. Its versatile combinations allow you to freely match a variety of interior styles, bringing a clean, modern touch to any living space.

## Smart Switches- DeFy Series

Defy switches are part of our premium, modern smart home lighting control series that combines touch & physical controls, available in multiple colors & switch combinations

## Smart Switches – Bach Series

Bach Series Smart Switch is a premium, Zigbee 3.0-enabled light switch designed to blend classical, elegant design with modern smart home technology.

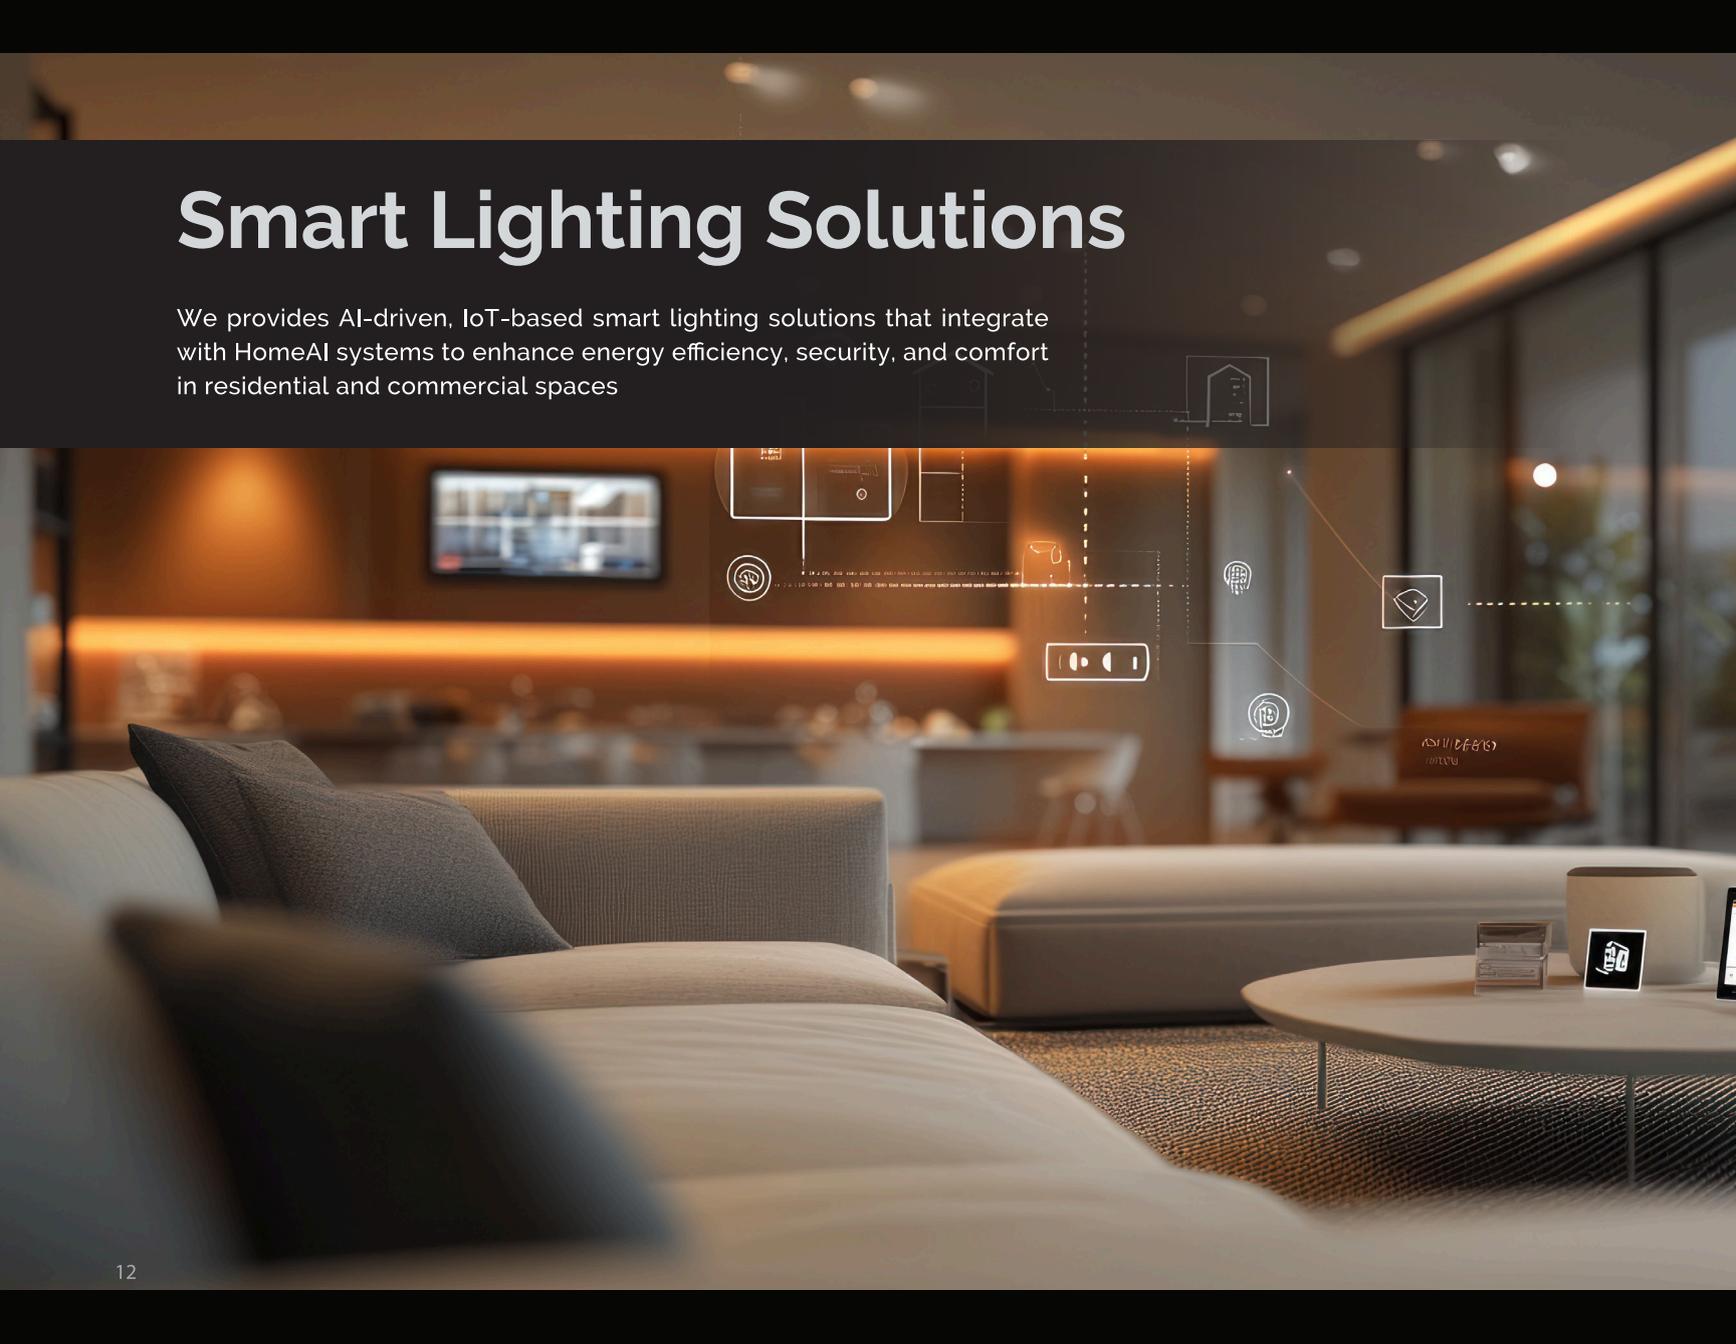

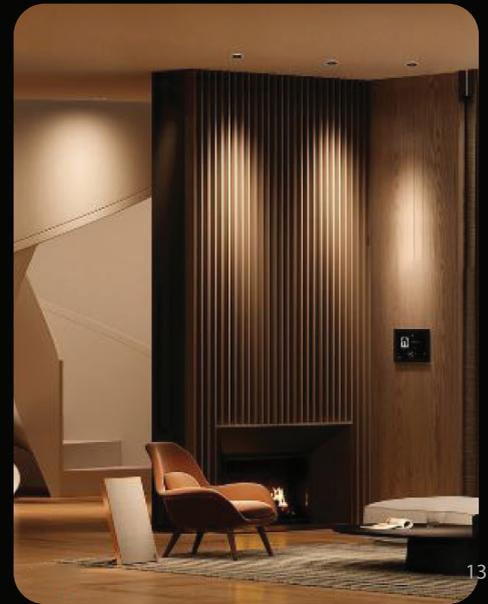

## Smart Switches – Gauss Series

Crafted with AG glass for a refined finish and available in Meteorite Grey, Sand Gold, and Pearl White, Gauss Series blends seamlessly into modern interiors with understated elegance.

# Smart Lighting Solutions

We provides AI-driven, IoT-based smart lighting solutions that integrate with HomeAI systems to enhance energy efficiency, security, and comfort in residential and commercial spaces

## Smart Decorative Lights

# S SERIES SMART LIGHTS

Super smart lighting **S series** is born for modern high-end homes. The full series covers 15 smart lighting products. Smart lamps for professional scenes such as star hotels, museums, etc.

## Two-way lighting lighting up the corners of your home

The light spot boundary is clear and distinct  
Equipped with 350° turn signal head  
Change the shape of light as you wish  
Add artistic atmosphere to your home

## Smart LED Light

- 💡 Light brightness & color temperature adjustment
- 🔌 Integrated design, plug and play
- 📱 App, Smart hub network control
- 🏠 Grouping management, full house smart lighting

## Ceiling Lights

### One-stop Lighting Experience

SKY DOME Pro contains 5 sets of light source modules, it can realize the basic white light for daily needs, situational lighting that simulates the blue sky, atmosphere lighting that simulates natural color light, and atmosphere lighting with soft backlight, all in one.

# Door Locks

Our smart door locks utilize AI for enhanced security and convenience, specifically through advanced biometric recognition and automated, adaptive features. The locks feature 3D face recognition (V5 model) and AI-driven fingerprint sensors that improve accuracy over time

Model C1

Model V5

AI 3D face recognition

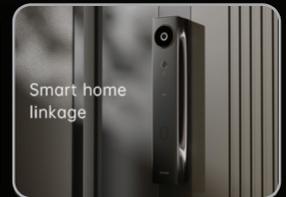

Whole-home distributed video intercom

1080P/165° visual doorbell

4-inch IPS high-definition internal screen

Smart home linkage

# Security Sensors

We provide a range of security, safety, and environmental sensors designed to enhance protection and improve comfort, all seamlessly connected within the smart home ecosystem

Door Sensor

Motion Sensor

Human Presence Sensor

Gas Leakage Sensor

Smoke Sensor

Water Leakage Sensor

Emergency Button

Temperature & Humidity sensor

# Shading

**ORVIBO Smart Shading** is an AI-powered, IoT-based motorized curtain system designed to automate sunlight management for increased comfort and energy efficiency. The system is part of the broader ORVIBO Home AI ecosystem, allowing for intelligent, automated, and remote control of curtains, blinds, and shades.

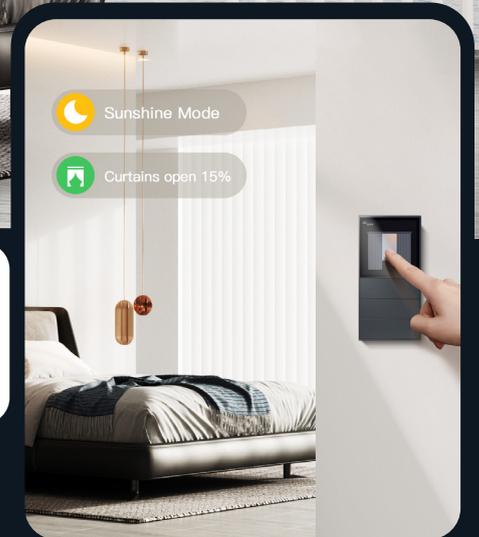

Sliding Curtain Motor

Tubular Motor

Curtain Motor Kit

# HVAC

The **ORVIBO MixStation** is a next-generation AI-integrated, whole-house central air conditioning system that combines cooling, heating, and hot water into a single energy-saving unit. Powered by AI and IoT

One-Screen intuitive control, easy for seniors and children

One machine for cooling, heating, and hot water

Air conditioning + Underfloor heating + Water heater

Ultra quiet with seven-fold noise reduction

Produced in the same factory as top European and American brands

Ultra quiet with seven-fold noise reduction

10-year warranty  
10-year warranty for the entire outdoor unit.

# Gate Automation System –

Powered by ORVIBO Smart Home

The ORVIBO enabled Gate Automation System delivers seamless, secure, and intelligent control for your property entrance. Fully integrated into the ORVIBO smart home ecosystem, it allows you to open, close, and monitor your gate remotely through the ORVIBO Home app or smart panels
